MARIJANA SEVO

Software Engineer

SUMMARY

I have a strong interest in full-stack development, with a particular focus on frontend technologies. It is highly satisfying to solve a problem and create something that has real-world use.

WORK EXPERIENCE

Shopify Frontend Developer, Black Lemon / Obsidian

Aug 2023 — Present

- Collaborated with other developers and designers via tools like GitHub, Figma, Linear, Slack, ensuring the best communication possible as it was crucial because teams were divided between Denmark and Bosnia.
- Implemented responsive design principles across multiple projects, ensuring optimal user experiences on all devices
- Working with clean, reasuable code, building components, etc.

Recent Projects:

Intersport – E-commerce shopify themes amongst which are stores like Intersport where main technologies used is Shopify's API, Shopify Liquid templating language, CSS/SASS/Tailwind, Javascript/Next.js

Software Engineer, Freelance

Jan 2022 — Aug 2023

- Worked independently as well as collaborated with marketing and design teams to create visually appealing UI/UX designs that aligned with clients' branding guidelines.
- Proactively identified and evaluated emerging technologies and tools relevant to the project requirements and learned them as necessary to ensure the successful completion of the project.

Example Project:

Zdrava Doza – This website is a comprehensive health resource dedicated to providing information on common health concerns. It covers topics related to physical and mental health as well as lifestyle factors that impact overall well-being.

Implementation Specialist and SW Support at NCR Corporation | BL, BiH

Feb 2020 — Jul 2021

- Collaborated closely with clients to ensure successful software implementation of new software services and conducted comprehensive training sessions for clients
- Conducted rigorous QA testing on newly implemented software, and identified and resolved all defects prior to product launch etc.

Junior Frontend Dev at asioso | Banja Luka, BiH

Jan 2017 — Nov 2018

- Collaborated with experienced programmers in an agile environment using tools such as Jira.
